InsightMRI Receives ISO 13485:2003 Certification.

Worcester MA, USA, June 2, 2008 - InsightMRI, an innovator in cutting edge MRI coil technology, has successfully completed an audit by the internationally accredited TUV SÜD America. This audit certified the compliance of InsightMRI's quality management system to the International Organization for Standards' (ISO) medical device quality standard 13485:2003. The certification covers the capacities at InsightMRI related to the design, development, and production of MRI coils, and ensures that these activities are conducted with the principle consideration to quality. Dedication to the quality policy, which is foundation of Insight's quality system, is of paramount importance to the activities of all employees at InsightMRI as a means of providing the best products in the industry.

About InsightMRI

InsightMRI manufactures MRI coils, coil systems, and holders for research and clinical applications. The company's coil products have been installed in clinical and research MRI systems from 0.2-11.7T; they offer unsurpassed SNR and homogeneity for imaging the head, torso, and extremities. For 10 years InsightMRI has been focused on providing cutting-edge technology to expand the use of magnetic resonance imaging and spectroscopy.
